

TIME FOR **YOU**

IT'S TIME FOR **YOU**

The time you spend in your bathroom should be about a moment of peace. This is our philosophy at Copenhagen Bath and the reason we offer not only great functionality, but also a mentally quiet and characteristically simple Scandinavian design.

Our unique patented Acovi® solid surface is a massive yet adaptable material that can be cast, shaped and even cut very thinly. This gives us amazing possibilities when creating beautiful bathroom furniture. It is pore-free and can withstand the test of time and splashing water. This makes it perfect for a wide range of products like wash basins, bathtubs, cabinets and shelves that Copenhagen Bath offers.

We even produce our designs in custom measurements to create your dream bathroom.

You now hold our new catalogue in your hands, so put your feet up, spend some time on yourself and get inspired and seduced by our many beautiful designs and collections.

The Scandinavian Suite product range is dedicated to avantgarde design, experimenting and research. Copenhagen Bath have in collaboration with Industrial designer Mikal Harrsen established a workshop based platform where we will explore the essence of the Scandinavian minimalist design tradition, and bring it into bathroom and wellness areas. Essentials, purity and minimalism are the keywords and the main focus for this range.

MIKAL HARRSEN

Mikal Harrsen has through his work gained international recognition and is the recipient of several international design awards. His works are characterised by tireless effort to get to the essence of objects and their purpose - functionally as well as aesthetically - and through the study of these relationships creating designs that relate strictly to function, in relation to the surroundings and last but not least - the human experience.

ACOVI® SOLID SURFACE

The Acovi® solid surface by Copenhagen Bath is an outstanding quality material containing natural minerals.

With its unique durability and a very smooth and pore-free surface, the Acovi® solid surface is perfectly suited for bathroom furniture such as bathtubs and wash basins. In contrast to other materials like porcelain and marble, the Acovi® excels in its warm, silky smooth surface that brings a pleasant kind of luxury to the bathroom of your dreams. You can choose your new wash basin from Copenhagen Bath with or without a tap hole. Therefore, both wall and deck mounted tap ware are a suitable match to our products.

Reasons why you should choose Acovi® solid surface:

- Easy to maintain with most cleansing agents
- Absolutely pore-free and very smooth surface
- Lime scale doesn't adhere easily
- Does not contain natural stone and therefore tolerates most toxic cleansing agents and descaler
- Personal care products and make-up do not spoil the surface
- Very durable
- Minor damage can easily be repaired
- 100% water resistant

YOUR OWN DESIGN

Our simple dream is that, *your* bathroom dreams are fulfilled.

When designing your new bathroom, pre-made products don't always suit your needs. That's why we at Copenhagen Bath can help you by making most of our product range in bespoke sizes.

Bathtubs and products which are cast in moulds can't be ordered bespoke; these products are only available as standard sizes.

If you have your own design, we can probably help! Either contact one of our showrooms or our office direct and we will help you with your request.
